INSTALLATION INSTRUCTIONS

PLEASE READ THE FOLLOWING INSTALLATION PRECAUTIONS AND INSTRUCTIONS CAREFULLY AND COMPLETELY, thank you.

INSTALLING THE ZAZEN STREAMLINE SHOWER FILTER WITH YOUR EXISTING SHOWERHEAD

**THE ZAZEN STREAMLINE SHOWER FILTER IS PRE-ASSEMBLED.
IT IS NOT NECESSARY TO DISASSEMBLE THE FILTER IN ORDER TO INSTALL IT.**

- STEP 1** Remove your existing showerhead from the shower pipe. This should just unscrew. It may be a little tight due to age.
-
- STEP 2** Wrap the enclosed Teflon tape tightly around the exposed pipe; this helps to seal the connection between the new shower filter and the pipe (to prevent water leaking).
-
- STEP 3** Attach the zazen Streamline shower filter unit to the shower pipe by screwing it around until it is tight and sitting upright as shown.
-
- STEP 4** Wrap Teflon tape to the zazen Shower filter outlet nut; this helps to seal the connection between the new shower filter and your showerhead (to prevent water leaking).
-
- STEP 5** Screw your existing showerhead onto the zazen shower filter unit
-
- STEP 6** Flush shower filter unit by turning the shower on and until the water clears. This will only take a few moments. (Cold water is fine). Check for leaks at the juncture of the showerhead and filter and between the shower filter and the shower pipe. Tighten as appropriate.

Congratulations! We know you will love your healthier shower experience...
thank you for your valued custom and support. With appreciation, the zazen Water team
